## COMP Cams® High Energy™ Timing Chain for 2009+ Dodge HEMI Engines w/ VVT

**Olive Branch, MS** – The High Energy Timing Chain for 2009 and later Dodge HEMI VVT applications provides exceptional durability in stock and high-performance applications.

COMP Cams now offers an excellent performance upgrade that exceeds all original equipment timing chain specifications without breaking the bank. The new chain works with the factory cam phaser and crank gear, so there is no need to replace expensive gears when swapping cams or simply replacing the OE chain. The upgraded chain features thicker plates than the OEM version, and offers over 10% increased tensile strength. This 3/8" pitch inverted tooth chain with 74 links allows for a direct replacement of the stock unit but as an overall stronger option.

Fits the following applications: 2009+ 5.7L HEMI w/ VVT, 2009+ 6.4L HEMI w/ VVT and 2015+ 6.2L HEMI w/ VVT.

### Quick Facts

**Product:** COMP Cams High Energy Timing Chain for 2009+ Dodge HEMI Engines w/ VVT

**Part Number:** #3050

**UPP Price:** Visit [www.edelbrockgroup.com/new-products](http://www.edelbrockgroup.com/new-products)

**Social Media Pitch:** The High Energy Timing Chain for 2009+ Dodge HEMIs w/ VVT won't break the bank when it comes time to upgrade your timing chain as factory cam phaser and crank gear can be reused.

### **Features & Benefits:**

- Improved quality increases durability over OEM timing chains
- Works with factory cam phaser and crank gear
- Economically priced
