### Edelbrock® E-Series Head Bolt Kits

**Olive Branch, MS** – Edelbrock introduces the E-Series Head Bolt Kits, a high-quality replacement set of bolts with washers for engines equipped with Edelbrock Performer RPM® Aluminum Cylinder Heads.

The new Edelbrock E-Series Head Bolt Kits are required when installing Edelbrock aluminum cylinder heads on an engine previously equipped with cast iron heads. Bolts used with iron heads do not require the use of washers, however they are necessary when using aluminum heads.

The bolts in the E-Series Kits are longer to compensate for the thickness of the required hardened washer. E-Series Bolts have a yield tensile strength of 190,000 PSI for strong and reliable loading with generous filleting throughout to eliminate stress risers. Bolt threads are rolled after heat-treating for superior form and strength, while a small hex head provides extra space for socket clearance in tight situations. E-Series Cylinder Head Bolts feature a durable black oxide finish with sealer and include the distinctive Edelbrock “E” stamped into the head.

#### Quick Facts

**Product:** Edelbrock E-Series Head Bolt Kits

**Part Number:** See Application Chart on Following Page

**UPP Price:** Visit [www.edelbrockgroup.com/new-products](http://www.edelbrockgroup.com/new-products)

**Social Media Pitch:** Edelbrock E-Series Head Bolt Kits include high-quality, elongated replacement bolts and washers for use with Edelbrock Performer RPM Aluminum Cylinder heads in a variety of applications.

#### **Features & Benefits:**

- Kits include required elongated bolts and washers necessary for use on aluminum heads
- Yield tensile strength of 190,000 psi for increased strength and reliable loading
- Filleting throughout eliminates stress risers
- Heat-treated and rolled bolt threads increase strength
- Small hex head provides extra socket clearance
- Durable black oxide finish
