Edelbrock® TC Transmission Controller

Olive Branch, MS – Edelbrock introduces its standalone transmission controller that provides transmission control over shift points, shift firmness, shift speed, torque converter lock-up, shift table, line pressure, speed calibration and more.

The new Edelbrock TC Transmission Controller is offered as a standalone transmission controller designed to work with Edelbrock Pro-Flo 4 and Pro-Flo 4+ EFI systems and most OE and aftermarket fuel injection systems with CAN communications or carbureted applications equipped with a standalone Throttle Position Sensor (TPS). It supports GM 4L60E, 4L70E, 4L75E, (up to 2010), 4L80E (post-1994).

Compatible with most iOS and Android mobile devices, the TC Transmission Controller is supported by an iOS Apple/Android “TC Tuner” app that communicates via Bluetooth communication between your device and the transmission controller, providing a simplified and intuitive user interface for setup, calibrating, and monitoring data. The TC Tuner includes a Setup Wizard with base tuning calibrations to further simplify user functionality. No software, laptop or tuning experience is required. The TC Tuner app can be downloaded for free from the iOS and Google Play stores, and upgrades/updates will also be available

Kits will include the TC Transmission Controller and clearly labeled auxiliary harnesses to provide a simplified installation. The system is essentially “plug-and-play” with capabilities for fully customizable performance. The compact housing of the unit is highly water resistant and dust proof and is simply to mount in the location of your choice.

Quick Facts

Product: Edelbrock TC Transmission Controller

Part Number: See Application Chart

UPP Price: Visit www.edelbrockgroup.com/new-products

Social Media Pitch: Get precise control of the shifting with the Edelbrock TC Transmission Controller that is offered as a standalone system to work with GM late model 4-speed transmissions, specifically 4L60E/4L65E/4L80E/4L85E models running either a carburetor or EFI w/ CAN communications.

Features & Benefits:

- Provides transmission control over shift points, shift firmness, shift speed, torque converter lock-up, shift table, line pressure, speed calibration, etc.
- Compatible with most iOS and Android mobile devices
- Bluetooth communication between personal device and transmission controller with free “TC Tuner” app
- TC Tuner features Setup Wizard with base calibrations and capability to fully customize tune
- Includes transmission controller and clearly labeled auxiliary harnesses for simple installation

Description	Kit Includes	Part #
Pro-Flo 4/4+ EFI Applications	TCU Controller, TCU Main Harness, Pro-Flo 4/4+ Engine Harness	36212
Generic CAN EFI Applications	TCU Controller, TCU Main Harness, Generic EFI Engine Harness	36211
Carbureted Applications	TCU Controller, TCU Main Harness, Engine Harness Carburetor	36213
Accessory Harnesses		
GM TOSS Late Style 4WD Extension		36217
GM TOSS Early Style 4WD Extension		36216
GM TOSS Early Style Extension		36215
